

Dina Villanueva

Experienced Front-End Developer skilled in React and React Native. Focus on performance, accessibility, and user-centered design. Passionate about creating seamless digital experiences and contributing to high-impact products.

EXPERIENCE

DEUNA, Mexico City: *Front-End Developer*

2021-CURRENT

Led the end-to-end implementation of a scalable, secure payment solution across multiple environments and platforms.

Integrated secure payment solutions including Click to Pay, managing the full certification process across environments (sandbox, staging, production) for both mobile and web.

Standardized voucher payments (OxxoPay, SPEI) and integrated BNPL providers (Kueski, Aplazo, Addi), accelerating activation of key partners.

Contributed to the redesign and automation of OTP login flows, improving both security and usability for guest and authenticated users.

Participated in the design and rollout of a new contract structure for payment methods, enabling faster adaptation and maintenance of integrations.

TELUS International, Remote: *Personalized Internet Assessor*

2020/07-CURRENT

Reviewed online search results in order to improve their content and quality.

Audited the language used in the search results by examining grammar, tone and cultural relevance.
